

LASERVORM

Laser Machines • Laser Processing • Wear Protection

THE LASER EGG OPENER

a clean solution

Safety and cleanliness are top priorities during pharmaceutical production. The contactless working laser therefore opens up a wealth of possibilities. As sole global supplier, we offer pharmaceutical manufacturers a special machine solution to the sterile opening of eggs. You too can profit by the advantages of the laser: We will support you from the initial concept right up to project implementation.

Feeding of plastic trays with eggs

The precisely adjusted on-the-fly control ensures the eggs are transported with care

Laser egg opening under clean room conditions at IDT Biologika

Service+

- Innovative laser machines
- Sterile and contactless process
- Minimal thermal load
- Technology partner
- Comprehensive consulting
- Process monitoring and control
- Complete services
- Operator training

Innovative technology

For our customers from the pharmaceutical industry, we have developed special laser cutting machines. The technology used for the precise and sterile opening of hatching eggs is deployed in vaccine production and has proved its worth worldwide. The machine is equipped with a high performance laser that opens several thousand eggs per hour.

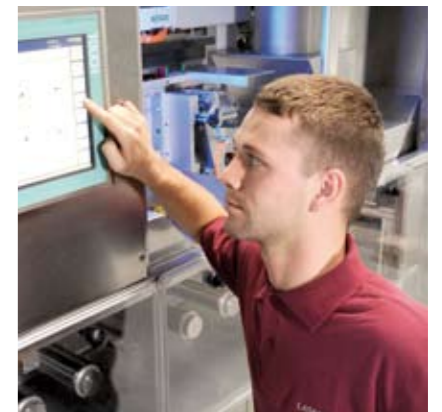

Custom-made machine solutions

Laservorm manufactures special machines for the particular requirements of the pharmaceutical industry. Output quantity, dimensions, working area etc. - we customise our machines to meet your technical standards. Certainly, we ensure compliance with clean room standards, GMP requirements, applicable regulations and more.

New market opportunities

Our specialists regularly explore new areas of application for laser technology in close collaboration with science and research. Why not take advantage of the market opportunities offered to you by this key 21st century technology? We welcome dialogue with your ideas. We will be happy to join you in developing an individual laser application, which will open up new areas of the market for you.

LASERVORM

Laser Machines • Laser Processing • Wear Protection

We are ISO 9001:2008 certified and use a modern, cross-sector production planning, resource planning and maintenance management system.

Drive

We are located in the Saxon city triangle Chemnitz-Dresden-Leipzig. You can either use the Chemnitz East motorway exit (A4) or that of Leisnig (A14). The nearest airports are Leipzig or Dresden.
